See below. This is for purchasing the equipment you requested for the shop/office. Mike has blessed usage of the contingency in the past before I have authorized. I just need someone to tell me to proceed with this before I direct the contractor to proceed and invoice against the contingency.

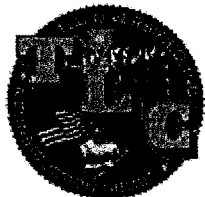

Thanks.

Subject: Items to be added to the Project

Bill,

Here are the other items that will need to be added to the project. If you deem it as a part of the project we can use the contingency to pay for these items. The fiber is a big piece of the project but is needed.

The contractor will need to purchase these items and install the fiber.

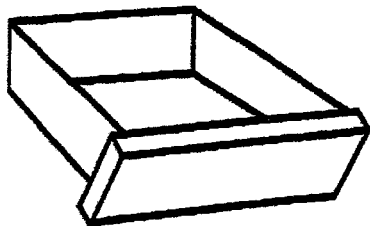

Let me know what I can do to help?

Thanks!

Sam
