Re: BS&A Work Order and Inventory Management

Mr. Weinand,

The Village currently utilizes VueWorks hosted CMMS to track public works and water utility work orders, inventory, and GIS integration. This hosted service costs the Village \$7,200 per year as a stand-alone system. The proposed item will replace the VueWorks system with the BS&A Work Order and Inventory Management module which fully integrates with the existing BS&A ERP system. Along with greater simplicity, the system will provide substantial efficiencies due to workflow with existing BS&A modules. In addition, after the initial purchase, the annual maintenance drops to \$1,540 annually, a savings of \$5,660. This provides the Village with an ROA of approximately 4.4 years.

Thank you,

Brad Gomberg
IT Manager
